

Since 2012 Desoma develops software solutions in the field of IP data and IP meta data with specialization in the sensitive business segment of real time data analytics where we are working with large corporations, utility companies and governmental entities for many years. Our solutions support as underlying technology various tasks in the Cyber Security field like ISO27001 controls, GDPR regulations as well as individual settings for data profiling, pattern analytics, cybercrime prevention and other cyber security and cyber defense scenarios in different industries like Finance, Transport, Telecommunications, Media and the Utility sector.

## Developer (f/m)

We are currently looking for software developers who are motivated to develop applications, improve existing ones or combine the art of design with the art of programming building an advanced cyber security platform. For these attractive positions, we are both interested in students that are eager to gain experience during a part-time employment as well as graduates looking for a full-time job. The positions are office-based from our headquarters in Graz.

### Responsibilities of the position:

- Participate in the entire application lifecycle, focusing on coding and debugging
- Develop new user-facing features
- Build reusable code and libraries for future use
- Troubleshoot and debug applications
- Optimize applications for maximum speed and scalability
- Collaborate with other team members and stakeholders

---

## WORK WITH US

### Requirements for the position:

- Hands-on experience with Java and Java Script
- Proficient understanding of code versioning tools, such as Git / SVN
- Analytical and time management skills
- Teamwork skills with a problem-solving attitude

### What you can expect from an employment at Desoma:

- The possibility to work in a dynamic and innovative environment
- The freedom to contribute to the team with all your personal strengths
- A comfortable and family-oriented corporate culture
- Flat hierarchies and flexible working hours
- An exciting business field as well as an attractive national and international customer network
- Central workplace as our office is located at Jakominiplatz
- 30 days annual leave

The collective minimum wage for this position will be € 2.338,- \* 14 per year in accordance with our collective agreement ST1 based on a full-time engagement. But of course, we are willing to overpay and offer a market-compliant compensation according to your qualification and experience level.

If you fit our requirements and have interest in this position as well as working in the exciting field of cyber security and cyber defense feel free to contact us. We are looking forward to receiving your application.
